Mr. Chairman,

With all the issues involving first mesa I need some direction as to what you all would like to do in regards to the drilling of the second well for the HAMP project. It is in the best interest of the tribe to drill the second well but I am not the one to make that decision. If you could provide that directive we can have them start drilling the second well upon completion of the first, they are near completion of the first well and they need the notice to proceed on the second. This was a council approved project, but IHS is leery to proceed without village or tribal approval. Please advise as how to proceed.

Thank you.

Lionel,

Can you get back to Vern Christensen in regards to the status of drilling the second well. The second well is an optional item in the contract. The IHS strongly supports drilling of the second well immediately following the completion of the first well. Yellow Jacket Drilling Services is within two weeks of being ready to start work on the second well site. They need to know whether they are going to be moving to the second well site in order to know how to schedule their drill rig, employees, and equipment.

Without a written directive from the Tribe to continue with the contract and drill the second well, Yellow Jacket Drilling Services will most likely de-mobilize their rig, equipment, and employees to pursue work elsewhere. To have them return at a later date to drill the second well would require a change order to the contract to account for the additional costs of having to mobilize twice.

Please advise.

Thanks,

From: Vern Christensen [<mailto:vern@yjdrilling.com>]

Adam,

Any word on the second well?

Best Regards,

Vern Christensen

Adam,

I will contact the lab for those results.

We really need to know if we are drilling the next well. There is a lot of work that we would like to bid, but it all depends if we're going to be busy at Hopi or not. Thanks

Best Regards,

Vern Christensen
